

PRODUCT CATALOGUE

Manufacturer Of Surgical Instruments
Since 1993

Since 1993

“Instruments Partner in Precision Surgery”

Hello,

Our journey in surgical instrument manufacturing began in 1993. Today, our second generation has elevated it to a state-of-the-art facility, crafting the finest surgical instruments.

We are committed to sharing the expertise we have gained over decades with each customer, and this drive for excellence has led us to adopt the best technologies from around the globe.

This catalog contains our complete range of surgical instruments and best practices for maintaining them. However, in line with our ongoing quest for refinement and new product additions, we invite you to connect with us for the latest updates.

Our microsurgical instruments, precisely crafted by skilled artisans and supported by advanced computer-controlled technologies, offer meticulous control, sensitive tactile feedback, superior balance, and attention to even the smallest details.

As a manufacturer, our goal is to be perceived as a partner offering solutions, rather than merely a seller.

ADVANTAGES OF TITANIUM INSTRUMENTS

- **Light Weight:** 45% lighter than stainless steel, reducing fatigue for surgeons during long operations.
- **No Rust – Long Life:** Excellent corrosion resistance, ensuring a longer lifespan.
- **Less Traumatic:** Titanium clamps provides atraumatic occlusion, making them ideal for various surgical applications.
- **Antimagnetic:** Prevents needle holders from sticking to suture needles.
- **Maintenance/Cleaning:** Easy to maintain with standard cleaning procedures.
- **Easy Identification:** Anodized in blue colour for simple identification.

MAINTENANCE INSTRUCTIONS

To protect your valuable investment in surgical instruments please follow below instructions,

Treatment of New Instruments

- Brand new instruments must be cleaned and sterilized before the first use. Ensure protective caps and layers are completely removed, especially on microsurgical instruments.
- Lubricate surgical instruments before sterilization to enhance their performance.
- If used correctly as intended, damage to the instruments is largely avoided.

Care

- Lubricate movable parts (e.g. joints and ends) with special sterilization-capable, vapor-permeable lubricant.
- After each cleaning and disinfection process, check instruments to ensure they function properly and have not suffered any damage (e.g., bent, stained, broken, fractured, or worn parts).
- Do not use defective or nonfunctioning instruments. Evaluation and repair can be performed by our service team, and non-repairable instruments should be discarded.
- Sharpen (scissors and cutters) and maintain instruments on a regular schedule to extend their lifespan.
- Do not expose instruments to temperatures above 120 degrees, as this may weaken their functionality.

Storage

- Store instruments in an organized manner in trays and containers to prevent damage. Instruments with fine working ends and/or microsurgery instruments should have protective caps.
- Ensure all instruments are thoroughly cleaned and dried before storage to prevent corrosion and contamination.
- Keep instruments in a controlled environment, avoiding exposure to extreme temperatures and humidity.

WARRANTY TERMS

Warranty Coverage: All products are warranted against defects in functionality and materials. Any product found to be defective in workmanship or materials during supply will be repaired or replaced at our discretion, free of charge.

Warranty Period: Specific warranty periods and terms vary by product. Detailed warranty information may be included in the contract agreement.

Unauthorized Alterations: Alteration, repair, or modification of any product by unauthorized persons will void the warranty.

Correct Use: When used correctly as intended, damage to instruments is largely avoided. However, if damage occurs, possibly due to misuse, only the manufacturer can determine if it can be corrected and to what extent repairs can be made.

User Maintenance Responsibility: To ensure warranty coverage, instruments must be kept free from rust and stains. Instruments that are not properly maintained will not be eligible for warranty coverage.

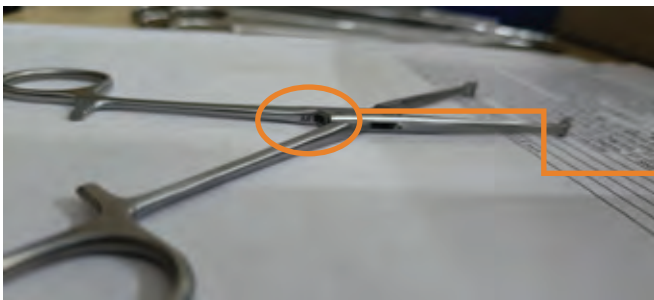

Void Warranty Conditions: This warranty will be void if any instrument is used for purposes other than originally intended, not properly maintained or cleaned, or damaged as a result of misuse or accident.

"Instruments are marked with the month and year of supply to track their warranty eligibility. For more detailed information, please refer to the next page"

Return Policy

- Products must be returned unused and intact within 15 days for acceptance. After 15 days, products will not be accepted for replacement.
- Cleaning, disinfection and sterilization must be performed prior to returning the instruments. Instruments with rust or stains are not eligible for replacement.

UNDERSTANDING WARRANTY CODES

Month Code (1st Letter)	1	2	3	4	5	6	7	8	9	A	B	C
Month of Supply	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Year Code (2nd Letter)	3	4	5	6	7	8	9	-	-	-	-	-
Year of Supply	2023	2024	2025	2026	2027	2028	2029	-	-	-	-	-

Note: The above example pictures show the locations of warranty code markings for different types of instruments. The code "A4" indicates that the instrument was supplied in October 2024 (according to the table, "A" represents October and "4" represents the year 2024).
